Student Technology Fee

The Board of Education approved a $3 per credit hour student technology fee at the March 18, 2002 public meeting. The fee was instituted in the summer of 2002 for all credit students and in the fall of 2002 for non-credit students. The fee was increased by $2 in fall 2009 and $4 in fall 2017, making the current fee $9 per credit hour for all students.

Technology Fee revenue is administered by the Chief Information Officer. Allocation requests are made through the department planning process and are reviewed and awarded by a standing review committee.
