

# Lane Community College GHG Inventory for Fiscal Year 2019

## Background

The Institute for Sustainable Practices (ISP) tracks greenhouse gas (GHG) emissions for all of Lane Community College's operations. The inventory for FY19 is in accordance with the IPCC's Fourth Assessment Report global warming potential (GWP) values, with a custom fuel mix for scope 2 emissions.

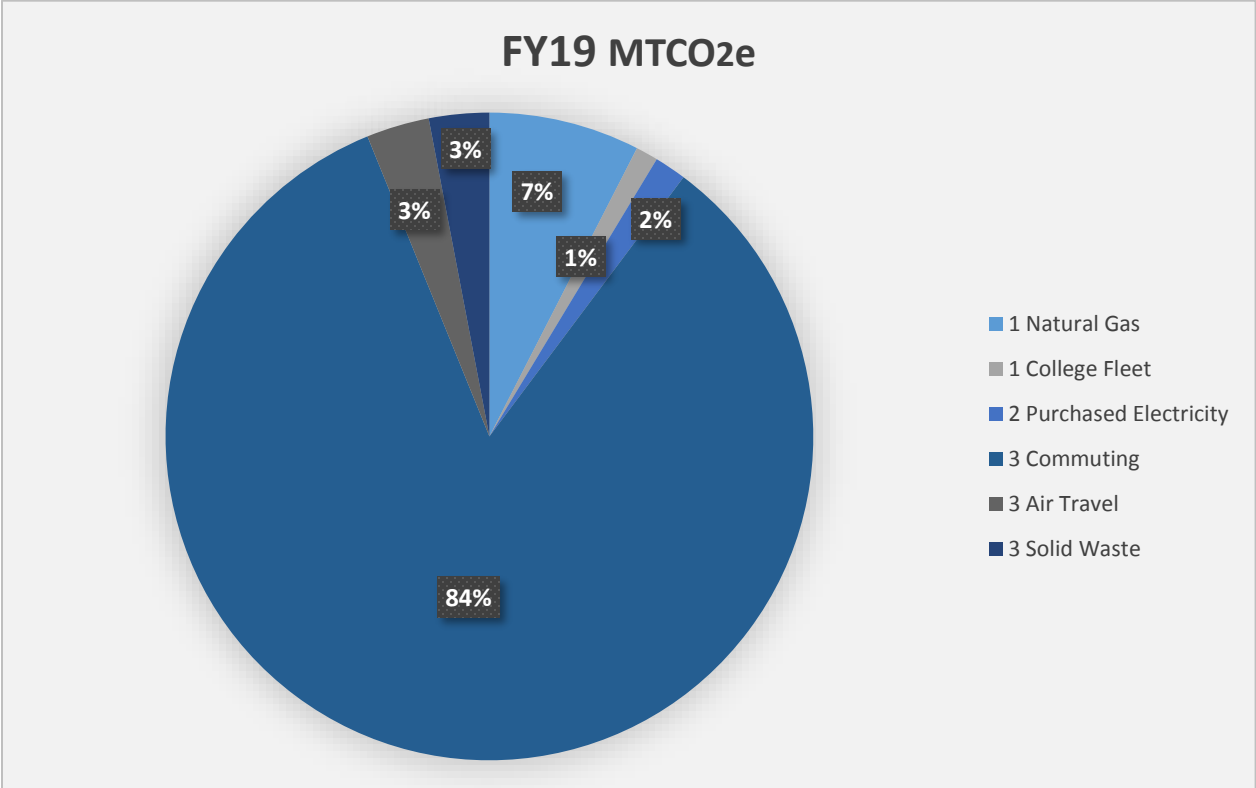

For FY19, the college had a total of 1,304,192 square feet of conditioned space distributed in seven different locations in Lane County, OR.
