

2024-25 Scholarship Ambassador TERRANCE-JAMES

Terrance-James | Unmanned Aircraft Systems Student

Terrance-James's journey to LCC is marked by his determination and passion for innovation. As a student in the Unmanned Aircraft Systems program, he carves out a path in a cutting-edge field poised for significant growth. Overcoming personal challenges, including navigating life with autism, TJ's story reflects his resilience and commitment to making a mark in the evolving world of drone technology.

Terrance-James has already made significant strides in the drone field, attributing much of his success to the **robust training and resources** at LCC. Looking ahead, he envisions contributing to an anticipated "drone boom" by 2029, with aspirations to participate in prestigious internships and potentially start his own drone company. His journey is a testament to persistence, as he has embraced every opportunity to advance in this rapidly growing industry.

LCC already has a really good program and it's also prestigious in the field of drones. We're really well known, especially for our trainees and the graduates that come out of the program."

-Terrance-James

Before, when I was 18, I never thought that I was able to go to college, just due to my autism, but now I see how much it has changed my life."

-Terrance-James

Why LCC?

Challenging coursework

Ample real-world opportunities

Innovative career paths

TJ discovered LCC's drone program during a tour while attending an alternative high school. Fascinated by aviation since childhood, he recognized the program as an opportunity to merge his passion with a promising career path. With the support of scholarships and encouragement from mentors, he seized the chance to pursue higher education at LCC.

College has already improved my life... I've discovered so many different things that, three years ago, I wouldn't have even imagined I could do.

-Terrance-James

A LASTING, LOCAL LANE

LEARN LOCAL, WORK LOCAL.
